

Swift Metal is a privately owned and well-known Australian component manufacturer. We manufacture and supply a wide range of componentry to a diverse customer base across the APAC region. Swift is growing quickly and as a result, the business requires a proven Quality Manager to lead and develop the Quality department in line with the business needs.

The Role

This is a critical role, in establishing a new standalone department, that will be responsible for identifying, designing and rolling out areas of improvement within quality procedures and standards to drive improvements across the site. Key duties include:

- Lead and coordinate the establishment of quality specifications and standards for components, in-house manufacture, and finished product.
- Lead and champion a Quality mindset throughout the business.
- Ensure compliance with government regulations and legal standards.
- Ensure suppliers conform with quality control and traceability requirements
- Assist sales team in resolution of manufacturing issues with key clients
- Participate in and contribute to new product launch projects.
- Work in collaboration with all areas of Manufacturing to understand how the products are made through the complete production line, understanding processes and issues, developing standards and leading quality improvements.
- Work with all parts of the business as required to assist in the smooth introduction and development of clear quality standards for existing business, new products, processes and models.
- Significantly reduce the 'Cost of Warranty' to the business.

Your Background

In order to be successful in this role you will have the following:

- Tertiary qualification in Engineering or related industry.
- Proven experience in a quality leadership position within manufacturing industry.
- Demonstrated leadership skills and work in collaboration with manufacturing teams to improve product quality.
- The ability to be both strategic and 'hands-on' as required.

If you want to make a difference in Australian Manufacturing and would like to discuss this opportunity further, please contact Dan Lindsay at Swift Metal on 1800 626525 or via email dan@swiftmetal.com.au.
